ABOUT

## Quick Rundown about myself

My name is Jason, I have been a Freelance designer for 4 years now, I have designed sites for companies, Bloggers, Parties & Gift Cards. I Enjoy outdoor sports, such as Baseball, Soccer, Cricket.

I used to have my own Radio station and host my own shows, I then switched to podcasting. In 2003 I launched many Startup sites.. which to this day still exist.

I wish to move on from Freelance to actually working for a company and doing what I love.

## The highs and lows of freelance

For years I worked as a freelance graphic designer, clients came and clients went (happily) but this still was not enough.. I was not making how much I should be making. The designs were top quality stuff but I was sometimes working for very small amounts or minimal compensation

I get called up by Major web companies now and again to redesign their site and maintain the Content Management system

## Conclusion

I wanted to make this resume as unique and as candy as I could, I hope you enjoyed reading as much as I enjoyed creating it.

I do not wish to work in freelance all my life, I would love to see myself in an office working with an actual staff that I can actually enjoy/ Interact with. I am a person that enjoys working in a team, but I can also get the work done when working solo.

Thank you for reading.
